Clark Totalift has a very outstanding worldwide support network. With over 550 locations globally, supplier representation in over 80 nations and 230 locations in North America, their high level of commitment to their consumers predominates the materials handling industry.

By revolutionizing the operator restraint system safety feature, Clark proudly remains a leader of innovation in the industrial equipment and automated lift truck industry. This exceptional commitment to safety is at this time a standard feature on every lift truck.

Clark has a unrelenting objective to possess the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift vehicles to be internationally certified with quality standard ISO 9001 in all of its manufacturing facilities. Also, the ISO 14001 Environmental Conservancy System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement enables Clark to be ready for any environmental limitations, thus placing them in a dominant market position.

Clark has selected the system of "Lean Manufacturing" at all of its assembly facilities for the reason that this technique is extremely economical and permits minimal use of resources. Developed to ensure maximum efficiency, this system is intended to discover and acknowledge the most efficient ways for production plant management. Clark has concluded this transition of its Korean facility. COPS which is Clark Optimized Production System, equally focuses on quality of product and services and production efficiencies.

By working in concert, Clark's product suppliers and engineers communicate towards improving product effectiveness while minimizing costs. The contemporary value engineering agenda combines modern product growth and provides improved consumer support and service within the industry.
